Our skilled Physical Therapy Team helps patients bounce back from pain or injury

Physical Therapy not only assists with speedy recovery before and after surgery, sometimes it can prevent surgery altogether. Our talented team treats a diverse range of injury and pain which is vital in helping restore, maintain and promote optimal physical function.

Following a thorough and comprehensive evaluation, our therapists develop a patient-specific plan of care to enhance movement. From moving in bed, transferring from one surface to another (bed to wheelchair), walking, or jogging/running, they improve the way patients move.

Our passionate healers assist with:

- Lessening pain
- Increasing stamina
- Restoring range of motion
- Shortening recovery time or hospital stays
- Reducing complications of surgery

Ask your doctor how Physical therapy can help or call 831.385.6835 for an appointment.

Happy birthday to Mee, and to our entire community!

We ate a lot of cake in 2022 — as it should be! This year, Mee Memorial Healthcare System celebrates its 60th anniversary as the cornerstone of our rural community.

Much has changed since Mee Memorial first opened its doors in 1962 but we still see the same togetherness in our close-knit community. And the dedication and professionalism of our amazing team providing care throughout South County.

Our 60th birthday celebration and ribbon-cutting ceremony July 14 in the rose garden, commemorated this event. On Aug. 6 we gathered for the King City Chamber of Commerce awards to take a bow as the 2021 Business of the Year!

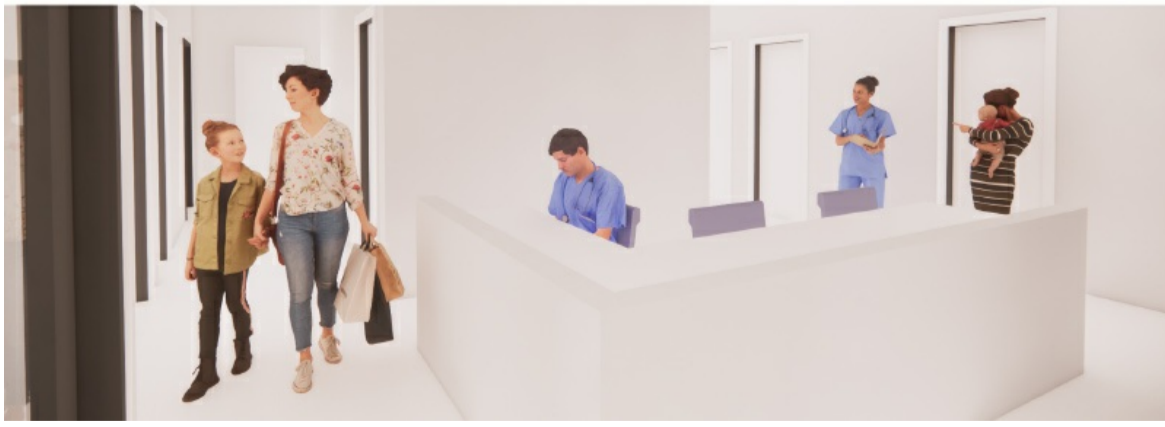

We thank our volunteers, donors, and the community for all your support and faith in what we do and stand for. We also thank a dedicated Service League, our valued Board of Trustees, and the Mee Memorial Foundation that over the decades has raised several million dollars for the organization.

Exciting renovations to Emergency and Diagnostic Imaging

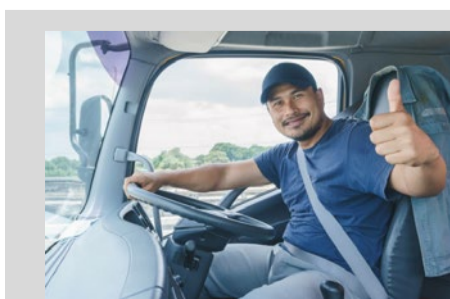

We are thrilled to report that we have received funds to help bolster our services in both the Emergency Department and Diagnostic Imaging. Representing the largest project the hospital has undertaken in 10 years, the project is currently underway with final plan designs. "It's a monumental commitment to the local community; re-establishing our presence as a proud member of the King City area, while also elevating the level of care and scope of services the organization's administration, physicians and staff strive to deliver to our patients everyday," said Dr. Timothy Watson, Director of Radiology Services. The renovation will bring more than two times the number of patient treatment spaces along with a modernized facility to optimally care for patients.

Mee Memorial Children's Health and Wellness Center

Our Pediatric Clinic (soon to be located in the Broadway Street building that serves Dialysis and Physical Therapy) is also moving forward. We hope to begin construction in September — and kudos to employee Nasareth Camacho — who won the clinic naming competition!

NEW IN KING CITY! In addition to injury and illness management, our Specialty Clinic in King City offers a full range of employment-related services in support of a safer, healthier workplace, delivering services such as medical & drug screening, DOT screening, DMV medical exams, and more!

Call today (831) 386-7401 to schedule a convenient appointment in King City, 400 Canal Street, Suite B.
